[artgurianov](#)

Staff full-cycle Product Engineer with 9 years of experience delivering robust, maintainable, and well-tested web and web3 applications using the **React**, **Node**, **TypeScript** as main tooling.

Renowned for strong feature ownership, I consistently take full responsibility for the planning and implementation of features from concept to launch. Highly collaborative, I work closely with clients, designers, QA, and developers to build polished products that drive results.

## Staff Product Engineer

📍 Remote, Italy • Jan 25 - Present

[motherhunt.com](#) | *web3 fashion auction platform*

[React](#) [NextJS](#) [MongoDB](#) [Turborepo](#) [Solidity](#) [Viem](#)

See *architecture details* on [my showcase](#)

- Designed a health-gated, fail-closed deployment pipeline (version-contract polling, backend-before-frontend ordering, automatic rollback) that protects critical operations from bad deploys
- Built a reporting/analytics surface aggregating daily **KPI snapshots**, volume metrics, and a live activity feed into customer-facing dashboards
- Designed correctness-critical data projections and an exactly-once **event-processing** pipeline with ordering guards and dedup
- Distributed cache invalidation** + multi-deployment architecture
- Two-tier RBAC, session enrichment, secure server boundaries
- Monorepo (Turborepo), docs-as-source-of-truth, ADRs/runbooks
- Lead a team of 3 developers through regular **code reviews** and **one-to-ones**, steadily elevating overall team expertise.

## Staff Product Engineer

📍 Remote, Italy • Aug 24 - Present

[mydaogs.com](#) | *web3 DAO crowdfunding platform*

[React](#) [NextJS](#) [Framer Motion](#) [Turborepo](#) [Solidity](#)

- Built a scalable architecture with **multi-network** deployment, aiding pre-mainnet testing and discovery of critical vulnerabilities.
- Consolidated code and components into a monorepo (**Turborepo**), reducing codebase by 35% and increasing deployment speed by 40%.
- Optimized **Next.js** pages from dynamic to static, lowering server load and cutting hosting costs by 20%.
- Supervised** a team of 2 developers, focusing on **code reviews** and professional growth.

## Staff Product Engineer

📍 Remote, Italy • Aug 24 - Jan 25

[blead.xyz](#) | *B2B SaaS notification system on telegram*

[React](#) [NextJS](#) [Telegram SDK](#) [Webhooks](#) [Wagmi](#)

- Designed and implemented a **serverless** architecture, integrating frontend, Telegram bot, and smart contracts via API, cutting business infrastructure costs by 60%.
- Designed and developed branding and UI in **React** for a seamless, conversion-focused user experience.
- Mentored** a junior developer, supporting their promotion to mid-level within 6 months.

## Senior Frontend Developer

📍 On-site, Moscow • Dec 23 - Aug 24

*Sber Tech* | *tech branch of the SBER ecosystem*

[React](#) [Typescript](#) [Module Federation](#) [Jenkins](#) [Nexus](#)

- Enhanced **performance** of the internal TipTap editor for 35% by profiling and optimizing the architecture
- Wrote playwright **autotests** for existing and new components getting to 91% coverage
- Optimized existing Jenkins CI pipelines to build almost half as fast by integrating **caching** flows for previously built steps as well as dropping redundant build steps
- Investigated vulnerabilities of the internal Nexus **npm** manager

## Senior Frontend Developer

📍 On-site, Moscow • Jan 21 - Dec 23

[eapteka.ru](#) | *online pharmacy marketplace*

[React](#) [Jest](#) [React Testing Library](#) [Redux](#) [Typescript](#)

- Selected the tech stack and built the architecture for a new CRM system in **React**, enabling migration away from a third-party provider and saving the company budget.
- Engineered complex components for the internal **UI-library** (Calendar, DatePicker, Tabs) and improved **test coverage**, accelerating development across projects and supporting brand consistency.
- Implemented cross-team **mentoring** sessions, fostering developer growth.
- Participated in migration from monolith to **micro-frontends**, increasing teams autonomy and platform speed by 45%.
- Showcased **product demos** and actively engaged in cross-team presentations.

## Fullstack Developer

📍 Remote, Moscow • Feb 19 - Jan 21

[voicy.ru](#) | *interactive greeting cards*

[NextJS](#) [GraphQL](#) [React](#) [Node.js](#) [Typescript](#)

- Led** the dev team and played a key role in bridging business needs with technical development.
- Established versioning and **Docker**-based CI/CD for **self-hosted** deployments, reducing hosting costs.
- Built core features with **React**, **NestJS**, and **GraphQL**.
- Coordinated** dev-business planning meetings.

## Fullstack Developer

📍 Remote, Moscow • 2017 - 2025

[artgurianov.com](#) | *Personal Portfolio & Web Studio*

[NextJS](#) [Contentful](#) [Next-Intl](#) [ThreeJS](#) [Typescript](#)

- Built a **multilingual** portfolio platform using **bleeding-edge** tech stack (**Next.js**, **Next-Intl**).
- Designed architecture, **branding**, and implemented modern stack projects for **studio** clients.
- Long-term support and updates.
